

FineDocs Mobile Web 1.0

FineDocs™

A Faster, Lighter, Smarter DMS for Smart Workers

Acyutah introduces FineDocs Mobile Web App 1.0

FineDocs Mobile, a Mobile Web app for Document Management On-the-Go enables secure access to enterprise content anywhere, anytime ensuring business continuity in a mobile world.

Ensures a native-like user experience with Mobile optimized view and no native app installation, **FineDocs Mobile** has broader reach and instantly accessible via a browser across a range of devices (PC/Mac, iOS and Android devices).

Highlights

- Mobile Optimized Views
- Secure Repository Access
- Create & Process, Search, Share & Collaborate while on move
- Instantly available and always up-to-date
- Improved User Experience

Content management is a core component of today's Enterprise infrastructure and Enterprise Mobility is changing the way businesses function. To keep up with the demands of the mobile workforce in rapidly changing business structure, **FineDocs Mobile** is here to provide the solution.

Simplified Access: Simplify the way you work and act on information with FineDocs Mobile no matter where you are.

Personalized Experience: Custom View, My Dashboard, Favorites let you personalize FineDocs experience across devices while on desk or while on the move.

Secure Content Access: Access documents and content directly from Server with full enforced security instead of transferring data to the device as native apps do. Enterprise-class security features protect the highly valued business content in the centralized repository.

Act on Information While on Move: Now, processes do not pause outside the office. Review, Approve and make decision while on the move. Get insight into progress and performance with compelling reporting and dashboard capability enabling real-time view of business metrics.

Universal Viewer: View Documents in PDF or Plain text for optimized view and Annotate in Mobile interface.

Always Up-to-date: FineDocs mobile web app is dynamic and controlled by Web Server in terms of pure flexibility for application updates. Unlike native app no software update is required on mobile.

Share FineDocs Link instantly: Share FineDocs Mobile Web application URL easily through Emails, Text message, Social Networks, Facebook or Twitter post, etc. Organizations can easily direct users to FineDocs Mobile web app from a blog or company portal.

Compatibility: FineDocs Mobile Web app includes a responsive HTML5 web client compatible across devices i.e. iOS and Android devices for smartphones, tablets and PC/Mac browsers e.g. Chrome, Mozilla, Safari, etc.

FineDocs Mobile is designed with the intention of accessibility from different devices and networks, enabling personalized mobile experience while accessing the same application.

Enhance productivity and efficiency in the workplace and generate higher flexibility with FineDocs MOBILE.

Accessed from Smartphone, Tablet and Desktop browsers, this lightweight application enables faster response.

Empower your Mobile workforce with information access and improve business responsiveness through **FineDocs MOBILE** enabling them manage the complete information lifecycle and business processes for better decision making ensuring maximum security and regulatory compliance.
